/ Read ahead to learn what some detail pros do....

We all love our cars. And perhaps our proudest moment is when the car is new and looks its best. A car, however, is not like a painting which serves its purpose in a controlled and safe environment. It is subjected to all sorts of abuses including the sun, dirt, and acid rain, all of which can affect the best automobile. But you can keep your car in new condition just like a painting protected in a museum.

FIRST Five Steps to keep your car looking its best.

1. Avoid scratches as much as possible

We start with scratches. Why? Because they are the biggest enemy to your car's finish. And avoiding scratches is the secret to keeping your car looking good. Dirt and grime, rubbed in while washing or drying, will act like sandpaper and dull your car's paint. There is one basic rule which will guide you whenever you touch the surface of your automobile: Anything that comes in contact with your car's finish should be soft.

2. As much as possible, protect your cars finish from the elements.

This means storing the car in a garage or covered area. Also, the use of a car cover is highly recommended. A car that is constantly exposed to sunlight and other environmental hazards will deteriorate quicker and require significantly more cosmetic maintenance.

3. Always keep a good coat of wax or paint sealant on the car.

In addition to providing gloss and depth, wax will also protect your car from the elements, including sunlight and many other circumstances that you will encounter, from bug carcasses to bird droppings.

4. Be aware of your car's finish.

Make regular quick inspections of your cars surface a habit. Look it over and note its condition, keeping in mind its recent history and what you anticipate will happen in the future.

5. Make a habit of detailing your car.

In most cases, washing your car once a month is adequate. Once every two weeks is better and necessary if the car is subject to harsh conditions. Its good exercise too!
